

Upgrade participant engagement and recruitment with MD Prescreen.

MD Prescreen optimizes generic clinical trial participant lead generation into highly qualified referrals through a concierge service powered by research nurses educating, pre-screening, and conducting EMR chart review.

+5000
patients screened through MD Prescreen

98%
patients processed within 2 business days

\$600-\$900
saved per screen fail with MD Prescreen

First patient enrolled
within two sites in a rare disease study

Let's transform recruitment to be better for participants and researchers.

Empower sites with qualified participant referrals, engaged patients, and a streamlined process for patient recruitment.

Trusted relationships and partners

Facilitate permissioned EMR chart review and patients are informed about the study.

Reduce screen-fail costs

Participant screening is done by research nurses who are the single point of contact.

More diverse participant base

Culturally competent research nurses engage with patients to inform and educate.

Reduce site burden, and increase site efficiency

Rapid outreach – initial patient contact done within 2 business days.

Continuity of care

Captured feedback throughout the entire clinical trial journey for each patient.

Improve the patient experience

Engagement through patient-preferred outreach via phone, text, and/or email.
